

UNIVERSITY OF EDUCATION, WINNEBA

TEACHERS' VIEWS AND EXPERIENCES ON PROFESSIONAL DEVELOPMENT
ACTIVITIES IN BASIC SCHOOLS FOR STUDENTS WHO ARE DEAF IN GHANA

SAMUEL KWASI AMOAKO-GYIMAH

M.ED. SPECIAL EDUCATION, M. A. SPECIAL EDUCATIONAL NEEDS

A Thesis in the Department of SPECIAL EDUCATION, Faculty of EDUCATIONAL
STUDIES submitted to the School of Graduate Studies, University of Education,
Winneba in partial fulfillment of the requirements for the award of Degree
of DOCTOR OF PHILOSOPHY, SPECIAL EDUCATION

SEPTEMBER, 2016

DECLARATION

CANDIDATE'S DECLARATION

I, Samuel Kwasi Amoako-Gyimah, declare that this thesis, with the exception of quotations and references contained in published works, which have all been identified and acknowledged, is entirely my own original work, and it has not been submitted either in part or in whole for another degree elsewhere.

Candidate's Name: Samuel Kwasi Amoako-Gyimah

Candidate's Signature.....

Date.....

SUPERVISOR'S CERTIFICATION

I hereby certify that the preparation and presentation of this thesis was supervised in accordance with guidelines on supervision of thesis laid down by the University of Education, Winneba.

Supervisor's Name: Professor Mawutor Avoke (PhD)

Signature of Supervisor:.....

Date.....

ACKNOWLEDGEMENT

I wish to express my most sincere and special thanks to a number of people, some of whom I can name, others I cannot, but all of them have, during the course of my study, made significant impact towards the completion of this study.

First of all, I wish to thank my supervisor, Professor Mawutor Avoke for his stimulating advice and ideas, accompanied by his continuous encouraging support to my study. Professor Avoke has always been inspiring, and every supervisory meeting I had with him helped me to make great leaps forward. Professor Avoke has also helped me to gain a deeper understanding, a deeper insight and appreciation of research methodology. Prof, thank you sincerely.

I wish to also use this medium to thank all the heads and teachers of the schools for the deaf for participating in my study, giving responses to my questionnaire surveys, and answering my questions in the interviews. I wish to sincerely thank Mr. Raymond Boison of the Management Information System (MIS) department of the University of Education Winneba, for taking time off his very busy schedule to analyze the quantitative data of this study. I also wish to thank all my friends and colleagues in the Department of Special Education who read and commented on the early drafts of the various chapters. With regard to this area, I wish to acknowledge the special contributions of Dr. Yao Yekple and Dr. Samuel K. Hayford all of the Department of Special Education, University of Education, Winneba for their very useful suggestions.

I would also like to give great thanks to my family for their patience and endurance during of my study. Therefore to my wife Gifty and my children Abenaa, Akosua, Afia and Yaw I say thank you all. Finally, I wish to thank all my students who assisted me in diverse ways towards the completion of this work. I also wish to thank Miss Annie Robertson

(Asoreba) for arranging the entire thesis and to my student Miss Alice Avornyo for her assistance.

DEDICATION

This thesis is dedicated to my wife Gifty and my children, Abenaa, Akosua, Afia and Nana Yaw. I am so grateful to you for your love, support, care and encouragement.

ABSTRACT

The study explored teachers' views and experiences on professional development activities in basic schools for students who are deaf in Ghana. The study specifically looked at the available professional development activities in the schools, teachers' views on how the available professional development activities make them effective, among others. The study utilized a convergent parallel mixed methods design with survey and case studies guiding the two aspects of the parallel convergent design. A sample of 144 teachers and 30 teachers were involved in the quantitative and qualitative aspects of the study. Questionnaire and focus group interviews were used to gather data for the study. Descriptive and inferential statistics were used to analyze the questionnaire data whereas the interview data were analyzed using the themes that emerged from the study. Findings from both questionnaire and interview data revealed that the available professional development activity for teachers was workshop. The study revealed further that mentoring existed in the schools but was done on informal basis. The study revealed that collegial development even though exists in the schools, focused on building the sign language proficiency of teachers. It emerged from the study that teachers' professional development needs were teaching strategies and skills, subject matter knowledge, proficiency in sign language and proficiency in the use of multimedia technology. The results of the study further revealed that teachers are influenced to attend professional development activities when the topics are interesting and will enable them to be effective as teachers. The researcher recommended that organizers of professional development activities for teachers of students who are deaf in Ghana should organize more professional development activities among other recommendations.
